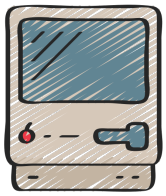
I'm a 23 y/o kid who likes writing short stories, coding, making music. Computers have been part of my life since day one, I see them the same way I see a videogame. Today I'm studying ML & AI in a VET Institute, and I'm looking for an internship (Jan - June 2024).



A bicycle for the mind.

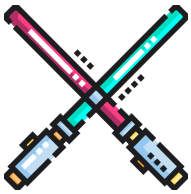
The computer is part of who I am.

Feed me knowledge.

I'm always reading something.

Blackbird singing in the dead of night.

I play the piano, guitar, and I write some lyrics.



Do or do not. There is no try.

When something is important enough, you do it even if the odds are not in your favour.
